《LOCKHEED SR-71A》

The Lockheed SR-71A of the USAF is a high speed, long range strategic reconnaissance airplane, and is also one of the most marvelous aircrafts in the world today by its performance and outline. The development of the A-11 (the prototype of YF-12/SR-71) started in secret in 1959 to meet the demand of CIA who requested the another high performance reconnaissance airplane to replace the U-2 Spy plane. Lockheed was selected as a contractor and a project team started chieftain by the famous designer K.L. Johnson. Their target was to design a high speed aircraft whose speed is over Mach 3. Their first problem was to obtain the material which maintains the enough strength over 400°C. The new titanium material Lockheed/TMC B-120 was developed for the A-11. The first A-11 flew on December 22, 1962, and this aircraft was then renamed YF-12A (fighter version). Although this YF-12A established several world's record including the speed record of 3,331.507km/h, it was not adopted as a fighter. The fourth aircraft in the A-11/YF-12 project (60-6937) then became the prototype of the SR-71. The first production model SR-71A (17950) flew on December 22, 1964, and the delivery started in January 1966 to the 4200th Strategic Reconnaissance Wing (later 9th Wing), Beale AFB, California.

It is said that around 30 airplanes were built including the SR-71B, training version, and the production was over in 1968. The SR-71A is called 'Blackbird' because it is entirely painted in flat black. Black color is the most effective to discharge heat in the air, and the flat finish helps unvisibility in high altitude.

SR-71 is a fighter aircraft with a height of 16,500m, length of 27.215m, empty weight of 27,215kg, speed of 3,716km/h (Mach 3.5) at altitude over 18,000m, service ceiling of 24,400m, range of 4,800km with one in-flight refueling, Reconnaissance Range: 17,000m, Service ceiling: 24,400m, Datas: Crew 2, Wing span: 16.95m, Length: 32.74m, Height: 5.64m, Wing area: 167.23m<sup>2</sup>, Empty weight: 27,215kg, Max. loaded weight: 77,110kg, Max. speed: 3,716km/h (Mach 3.5) at alt. over 18,000m, Service ceiling: 24,400m, Range: 4,800km with one in-flight refueling, Reconnaissance Range: 17,000m,
