**GB**

The Hawker Sea Fury was developed towards the end of the Second World War and was the last and most powerful piston engine fighter to serve with the Royal Navy. Considered the ultimate in piston engine fighter design, it arrived in service in 1947 too late to see conflict against the Japanese in the Pacific. Instead the Sea Fury saw service in the Korean war. Flying from various aircraft carriers it was a potent fighter bomber, attacking North Korean targets with a range of ordnance as well as serving as photo-reconnaissance machine and even destroying a MiG-15. Its powerful Centaurus engine gave the Sea Fury a fearsome turn of speed, which combined with its four wing mounted cannons and array of underwing weaponry made the Sea Fury a powerful adversary. Retired in favour of jet aircraft in the mid-1950s the Sea Fury went on to serve with a variety of overseas operators such as the Royal Australian Navy, Dutch Navy and Canadian Navy. Today restored examples are prominent performers on the air show circuit, impressing crowds with their awesome power and manoeuvrability.

**FR**

Le Hawker Sea Fury, développé vers la fin de la Deuxième Guerre mondiale, fut le dernier et le plus puissant avion de chasse à hélice de la Royal Navy. Considéré en tant que le nec plus ultra en matière de conception de chasseurs à moteur à pistons, il entra en service en 1947. Bien que trop tard pour participer aux combats contre le Japon dans le Pacifique, il fut néanmoins en service pendant la guerre de Corée. Opérant à partir de divers porte-avions et muni d'un armement varié, ce puissant chasseur-bombardier attaqua des cibles nord-coréennes, même abattant un MiG-15 ; il fut également utilisé comme avion de reconnaissance photo. Son puissant moteur Centaurus lui donnait une vitesse redoutable qui, combinée avec ses quatre canons montés sur les ailes ainsi que son armement divers fixé sous les ailes, fit du Sea Fury un formidable adversaire. Remplacés par des avions à réaction au milieu des années 1950, les Sea Fury continuèrent à servir au sein de plusieurs flottes d'outre-mer telles que la Marine royale australienne, la Marine néerlandaise et la Marine canadienne. **DE**

Die Hawker Sea Fury wurde gegen Ende des Zweiten Weltkriegs entwickelt und war das letzte kohlengetriebene Kampfflugzeug, das von der Royal Navy eingesetzt wurde. Weithin als konstruktiv ausgereiftester Jäger mit Kolbenmotor angesehen, der gebaut wurde, wurde die Sea Fury erst 1947 und damit zu spät in den Dienst übernommen, um noch gegen die Japaner im Pazifikeingreifen zu können. Sie wurde dann aber im Koreakrieg eingesetzt. Von verschiedenen Flugzeugträgern aus griff sie als durchschlagskräftiger Jagdbomber nordkoreanische Ziele mit verschiedenen Geschossen an. Sie wurde aber auch als Aufklärer eingesetzt und schoss sogar eine MiG-15 ab. Ihr leistungsstarker Centaurus Motor verlieh der Sea Fury eine hohe Geschwindigkeit und Beschleunigung. Mit vier flügelmontierten Maschinenkanonen in Verbindung mit einer Vielfalt von unter den Tragflächen angeordneten Geschossen bewährte sie sich als kampfstarkes Kriegswerkzeug. Ab Mitte der 1950er Jahre durch Düsenflugzeuge ersetzt, wurde die Sea Fury auch von mehreren ausländischen Luftstreitkräften eingesetzt, beispielsweise von der Royal Australian Navy, der Koninklijken Marine der Niederlande und der Canadian Navy. Heute noch beeindruckend flugtauglich

**ES**

El Hawker Sea Fury fue desarrollado a finales de la Segunda Guerra Mundial y fue el último y el más potente de los cazas con motor de pistón que prestaron servicio en la Royal Navy. Considerado el diseño definitivo en cazas con motor de pistón, no entró en servicio hasta 1947, demasiado tarde para intervenir en el conflicto contra Japón en el Pacífico. Sin embargo, el Sea Fury sí participó en la guerra de Corea, donde demostró ser un potente caza-bombardero operando desde portaaviones en misiones de ataque con artillería sobre objetivos en Corea del Norte, en tareas de reconocimiento fotográfico e incluso destruyendo un MiG-15. Su potente motor Centaurus proporcionaba al Sea Fury una tremenda capacidad de aceleración que, combinada con sus cuatro cañones en las alas y diverso armamento de bengalas, lo convirtieron en un poderoso adversario. Tras su retirada a mediados de la década de 1950 en favor de los modelos de reacción, el Sea Fury continuó en servicio en distintos ejércitos extranjeros, como la Armada Real Australiana, la Armada de los Países Bajos y la Armada de Canadá. Algunas unidades restauradas se utilizan

**SE**

Hawker Sea Fury, som utvecklades mot slutet av andra världskriget, var det sista och mest kraftfulla jaktflygplanet med kolvmotor som tjänstgjorde i brittiska Royal Navy. Det utgjorde det allra senaste inom kolvmotordesign, men introducerades för sent (1947) för att sättas in mot Japan i Stillahavsområdet. Sea Fury användes istället under Koreakriget, där detta effektiva jaktflygplanet attackerade nordkoreanska mål från olika hangarfartyg med olika typer av bomber och tjänstgjorde som fotograferings- och spaningsplan. Det lyckades till och med skjuta ned ett MiG-15-plan. Sea Furys kraftfulla Centaurus-motor kunde accelerera mycket snabbt och utgjorde en mycket farlig motståndare tack vare de fyra vingmonterade kanonerna och de olika vapentyperna under vingarna. Sea Fury pensionerades till förmån för jetflygplan i mitten på 50-talet, men fortsatte att användas av flera flottiljer, inklusive den australiensiska, holländska och kanadensiska. Renoverade exemplar har bibehållit sin höga effekt och omfattande manöverbarhet och imponerar numera på besökare vid flyguppvisningar.

Airfix would like to thank The Fighter Collection, The Fleet Air Arm Museum, Steve Long of the Camden Aviation Museum and Roy Sutherland for help with this kit.
